FRONTEND ENGINEER ARTTAC SOLUTIONS Apr 2025 – present Nürnberg, Germany. Development of frontend interfaces for AI-powered platforms using Vue.js and TypeScript. Experienced in building and automating workflows, integrating LLMs, and optimizing performance for complex web applications. AI ENGINEERING INTERN UDIT- DEPARTMENT OF HISTORY Jun 2025 – Jul 2025 Madrid, Spain. Designed and implemented an educational platform based on Retrieval-Augmented Generation (RAG) for querying academic content. Integrated LLMs and contributed to the development of information retrieval pipelines, focusing on automating data extraction and validation processes.

E

PISTEMONIKOS

May 2022 – Nov 2022 Santiago, Chile.

Developed and maintained a web platform for classifying evidence-based medical academic documents. This included implementing new features, optimizing performance, and resolving incidents.

TECHNICAL SKILLS

● Frontend Development : HTML, CSS, JavaScript, TypeScript, Vue.js (Vue 2 y Vue 3), Vue Router, Vuex, Vuetify, Sass ● Backend & APIs : Python, Django (basic), FastAPI, REST APIs ● LLM Systems : RAG pipelines, vector databases, prompt engineering, AI agents, LLM application architecture ● AI & Machine Learning : LangChain, LlamaIndex, OpenAI API, TensorFlow ● Data Analysis & Visualization : Python, R, RStudio, amCharts, Chart.js ● Dev Tools : Git, GitHub, GitFlow, Docker. ● Testing : Cypress, Jest ● Languages : Spanish (Native), English (C1 – Professional working proficiency)
